

Ford/Roush 6R140 Transmission Service Intervals

Service Update #18-0516

Service Intervals Have Changed

We have verified that Ford has changed the service intervals for the 6R140 transmission in the Blue Bird Vision (BBCV) product.

The Driver's Handbook and Service Manual for model year 2020 will now read that the interval is **ONLY** measured in mileage (150,000 miles). Previously the service interval included a time limit of 24 months.

PLEASE SEE THE INFO ON CORRECTING CURRENT DOCUMENTATION ON THE NEXT PAGE

Or at the [New York Head Mechanic website](#)

Under the 24 months or 150,000 miles listed in the spec/maintenance section (fluid and filters) the 24 months should be marked through and not used.

Going forward 150,000 miles will be the indicator for servicing the Transmission fluid.

6R140 Transmission				
*Transmission Fluid	Mercon LV	16.7 - 19 Quarts	Ford 6R140 (BC3P-7G186-BE)	<i>Transmission refill capacity is substantially less than the initial fill because some fluid remains in the transmission cavities after draining. Service every 24 months or 150,000 miles whichever occurs first.</i>

PLEASE REMEMBER THAT THE FLUID CHARACTERISTICS ARE DIFFERENT WITH THE 6R140....
