

Auxiliary Warning Light Kit – Thomas C2 Brackets

Parts Update #17-10

SoundOff Lighting “Auxiliary Warning Light Kit”

New York Bus Sales has front light mounting hardware. Some customers have reached out wanting to know the best way to mount the lights on their Thomas C2/ Freightliner units. We have designed mounting “plates” which allow the lights to be mounted in the lower corners of the grille, when mounting to the lower hood would interfere with the front bumper.

Figure #1

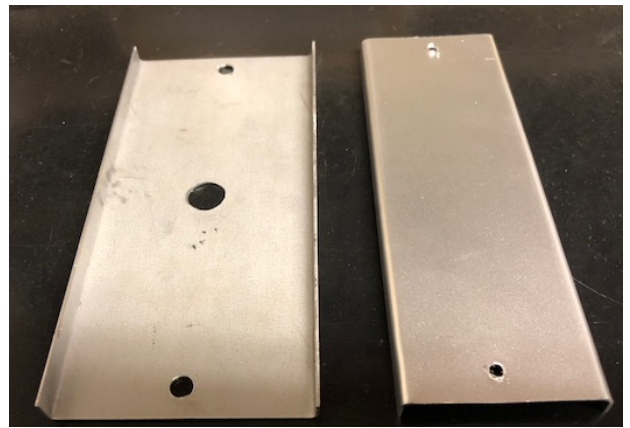

Figure #2

There are 2 pieces (Figure #1 & #2), and they are designed such that the wider of the 2 fits over the outer grille while the thinner fits inside the grille. Using 2-#8 X 2" phillips pan head sheet metal screws, you can mount the lights by putting the screw through the lights and outside bracket and then screwing to the inner bracket (FIGURE #3 & #4).
