ALL of our Service Updates can be found on the [New York Bus Sales website](#)
Or at the [New York Head Mechanic website](#)

PLEASE NOTE

- The idle Timer is only displayed when the engine is running and the bus is not moving over 1 MPH.
- If the Idle Timer reaches the 20-minute mark, nothing will happen and the unit will continue to idle resting on the 20-minute mark.... This is true of the Hi-Idle feature.
- Propane units are not affected by this. The requirement on a diesel requires displaying the DEF level which meant that the mileage quadrant needed to be used for the Idle Timer. (See Propane Display Above)
