

Experience Advanced Safety Technologies that Help Your Bus Drivers Handle Road Conditions

Sign up for this special Bendix® Ride-Along Event

UPDATE! New York Bus Sales has secured a gasoline powered Vision demo and a Bendix® air-disc brake unit available for a test drive!

**Electronic Stability Control (ESC):
You Have To Experience It!**

At the Bendix Ride-Along, you'll be able to see and feel the difference between a bus without ESC – and with the ESC system engaged. A professional driver will safely put the bus through a controlled road course while demonstrating how it works on road situations like slick surfaces and suddenly appearing obstacles. You'll learn how ESC:

- Boosts driver confidence by activating only when necessary
- Helps mitigate slides and skids
- Works on both dry and wet surfaces
- Delivers the highest level of stability performance

**Bendix Air Disc Brakes:
Designed To Create The Perfect Stop**

You'll also experience new Bendix ADS22X™ air disc brakes that:

- Provide surer, safer stops
- Require less maintenance
- Deliver longer pad and rotor life
- Lower your total cost of ownership

July 21st, 2016

9am - 4pm

NBT (Syracuse Chiefs) Parking Lot
