

Tech Tip

From your friends at New York Bus Sales

Product Effected – Blue Bird units with Air Brakes

- Complaint:** *The steel guard used to insulate the rear air lines from exhaust heat cause the exhaust pipes to prematurely rust thru.*
- Cause:** *These shields being down where all the road debris, slush, ice and those wonderful chemicals used on the road have cavities and voids where these items are held and cause the process of deterioration to accelerate.*
- Correction:** *Blue Bird currently uses a sleeved “heat shield” which goes over the air hoses to protect them from heat. These sleeves can be used in lieu of the steel heat shield.*

PLEASE NOTE – HEAT SLEEVE PART # 00118668
