

# Tech Tip

FROM YOUR FRIENDS AT  
NEW YORK BUS SALES!

## Blue Bird BBCV-Vision T3FE/RE-All American

- Complaint –** The **CHECK ENGINE** and **ENGINE WARN** light is on and when the unit is scanned for codes, none are found.
- Cause –** There is something pushing down on the “REGEN” switch holding it in the on position. More so with the positioning of the switch on the T3, if a Tech pulls the wiring harness from the “A” pillar to check for an issue and does not properly tie it up or put back in the cavity it may fall down on the switch and hold it in the “ON” position. This will cause these lights to illuminate.
- Correction –** Should these lights appear without a code check to make sure there is nothing holding the switch in the “ON” position.

ALL of our Tech Tips can be found on the New York Bus Sales website at
