WEBASTO PRE-HEATER FUEL FILTER “O” RING

We were recently made aware that on the fuel filter for the Webasto Scholastic Heaters there is a “Square-Cut” “O” Ring (Figure #2) on the threaded portion of the filter base (Figure #1).

We were contacted as the “O” Ring was NOT present in the box with the new filter (Figure #3) and we contacted Webasto regarding this as customers felt that it would be required when changing the filter during service. Webasto informed us that changing the “O” Ring was NOT required and they had units that had been in service over 15 years without having been changed and it was NOT a service part but only included with a replacement filter head as seen in Figure #1.

We did research the “O” Ring and found that we could provide it separately for those who feel it should be replaced or if you find one damaged!

THANK YOU
To Jason Johnson at Horseheads CS
for bringing this to our attention!
