FROM YOUR FRIENDS AT  
NEW YORK BUS SALES!

## Stainless Steel Braided From Compressor to Air Dryer

- Complaint –** We found that the stainless steel braided line from the compressor to the air dryer had a spot where the braids are broken and the rubber hose is starting to “bulge” through, please see Figures #1, #2 & #3.
- Cause –** We believe after reviewing several units that the cause maybe associated with the plastic tag which is on the hose as identification Please See Figure #4. We suspect that road chemicals trapped beneath the tag along with the varying change in temperature as the units cycles air compressor cycles may be what is leading to the issue.
- Correction –** Remove the tag from the line
