## DOOR WHISTLE ON MICRO BIRD MBII MODEL BUSES

Customers have been reporting that on some MBII they own, the double entrance doors are whistling on the road. We have not taken this lightly and have done some changes to our design to avoid this.

The following things have been changed in production and may be done to stop this unpleasant noise.

- We started by inverting the door seals.
- We installed rubber sweeper behind the door stoppers which, at first, was full length.
- The design of that part has been revised and now has a new shape. If you have sweepers on your bus, you may cut it as per the drawing below.
